

DataLink™ adds the processing power of your PC to the GradeMaster™ and Advantage™ line of scanners. Results from tests, surveys and ballots can be quickly captured in a spreadsheet format. Advanced item analysis and class roster reports can be generated easily. Data can also be exported to statistical programs such as Excel™, Access™ and SPSS™ for further analysis. Convert pencil marks into a powerful database using DataLink™.

FEATURES

- Item analysis reporting for exams
- Frequency tabulation for surveys, ballots and course evaluations
- Subtest reporting
- Weighted scores by test question
- Wizard for importing student database
- Wizard for exporting scanned data
- Exports for popular Gradebook applications

MINIMUM HARDWARE REQUIREMENTS

- Windows 98, 2K, ME, NT or XP
- Pentium III processor
- 500mHz processing speed
