

Grade Master

AUTOMATIC TEST SCORING MACHINE, REPORTING AND ANALYSIS

Grade Master 600 FC Test Scoring Machine (TSM) helps instructors make the most of teaching and training by automatically scoring tests and analyzing results.

With the Grade Master 600, instructors can accurately score 30 to 40 tests per minute and then immediately determine how students performed. Item analysis capabilities determine how many students missed each question, which helps define the validity of a test, as well as identify any study areas that need additional emphasis. The scanner also offers the ability to have the correct answer printed next to the wrong answer, which enables students to perform independent review of their errors.

ComsysScan Grade Master 600 FC

Advantages

- Automatic Score Objective Test Paper.
- Mix Subjective and Objective Score.
- Process up to 2000 Forms per hours (33 forms per minute).
- Print Raw Score and Percentage Score Report.
- Item Analysis Report.
- Difficulty Report.
- Distractor Function Analysis.
- Accuracy Rate up to 100%.
- World Proven Record.
